

Acceptance Certification and Safety Cases

Acceptance and Certification activities can often be a major hurdle to the timely introduction of military capability. Of critical importance is the planning and management of Acceptance activities including Certification, Safety Cases etc from the earliest stages of the programme.

Alliance has worked on many projects in different domains for all aspects of Capability Management from eliciting of the User Requirement through to Acceptance of Capability by the relevant service customer.

Advice and Support can be provided in the following areas:

- Development of URDs and SRDs
- Development and Management of Integrated Test Evaluation and Acceptance (ITEA) planning
- Hazard Analysis
- Environmental Safety Management
- Investigation of Human Factors/Ergonomic issues
- Software Safety
- Management of Combined Test Teams (CTT)
- Management of Certification Evidence
- Maintenance of DOORS databases
- Production and Management of Certification documents

Harrier GR9

A major and on-going support contract to provide specialist support to the Harrier IPT for the introduction of the Harrier GR9. The contract has included all aspects of the acquisition, ITEA, capability insertion, and acceptance.

Also part of this contract has been a number of investigations and studies into all aspects of managing the aircraft programme through-life.

A key part of the service has been the independent 'Intelligent Customer' function for all aspects of the aircraft trials programme.

Alliance offers an in depth capability to provide a wide range of Acceptance Services throughout **all** domains.
